## EXPERIENCE

### McCourt Global Technology

#### Sr. Software Engineer (Frequency Access Team)

Aug 2023 – Present

Jan 2025 – Present

Promoted within a year for outstanding performance and taking ownership of projects.

- Spearheaded an initiative to convert our frontend stack to Typescript and Svelte 5.
- Researched and implemented a variety of cryptographic capabilities (e.g., key exchange).
- Designed the architecture for mobile client authentication with JWTs and refresh tokens.
- **Stack:** Kotlin, Spring, Svelte, Typescript, Redis, and Postgres

#### Software Engineer (Frequency Access Team)

Jan 2024 – Jan 2025

Transferred to a full-stack team building an SSO and account management web application for a social media platform (Frequency) backed by an open protocol.

- Created an end-to-end test suite for our web application using Playwright.
- Developed support for passwords and passkeys as authentication methods.
- Built out a Spring-Boot service for sending texts with SMS fraud prevention logic.
- Implemented phone number blocking based on arbitrary prefixes via a Trie.

#### Software Engineer (Elemint Team)

Aug 2023 – Jan 2024

Hired to work across the stack and bring functional programming experience to a small team building a customer loyalty product for a French soccer league.

- Developed React components using Tailwind CSS, implemented endpoints, added front-end features, and wrote Postgres migrations.
- Mentored peers and championed usage of algebraic data types and generic typing.
- Transformed requirements into concrete technical specifications and tickets
- **Stack:** Typescript, React, Storybook, NextJS, and tRPC.

### Disney Streaming • Software Engineer

June 2022 – Aug 2023

Recruited to a Scala team focusing on tools for AWS Kinesis, including schema registry, code generation, and producer and consumer SDKs.

- Added features to SDK's, 'stream-based' services, and code generation pipelines.
- Analyzed and optimized AWS usage, resulting in annual savings over \$1M.
- Created dashboards that enabled faster resolutions to production incidents.
- **Stack:** Typelevel Scala, AWS Kinesis, Terraform, and Smithy.

### Agot AI • Software Engineer

June 2021 – June 2022

Hired to develop integrations and algorithms for a computer vision feedback system.

- Implemented microservices in Python communicating via RabbitMQ.
- Wrote Python libraries for standardizing consuming and producing RabbitMQ events
- Doubled the rate of training data produced through process improvements.

### Skyworks Solutions • Software Engineer (Intern)

Jan 2021 – June 2021

Brought on to assist the audio deep learning team by performing machine learning experiments, administering cloud resources (e.g., MongoDB and TPU instances), and writing tests.

### Lucid Software • Software Engineer (Intern)

June 2020 – Sep 2020

Developed new front-end components and added features to API endpoints.

### CBT Nuggets • Software Engineer (Intern)

June 2018 – June 2019

Worked on the mobile apps team (part-time during college) developing for iOS and tvOS.

## ABOUT

Software engineer with 5 years of professional experience, expertise in leveraging functional techniques and type systems to prevent bugs, and a track record of success in environments ranging from early startups to massive enterprises.

Located in Portland, OR.

## EDUCATION

### Oregon State University

B.S., Computer Science (4.0 GPA) 2017–2021

Relevant courses:  
Programming Language Fundamentals (Haskell) & Deep Learning.

## PROJECTS

**Lovelace** — A shift schedule designer developed with React and TailwindCSS.

**PaperECG** — An application that digitizes ECGs built with PyQt.

## PUBLICATIONS

[Digitizing ECG image: A new method and open-source software code](#)

Computer Methods and Programs in Biomedicine, June 2022.

[Real-Time Speech Workload Estimation for Intelligent Human-Machine Systems](#)

Human Factors and Ergonomics Society Annual Meeting, 2020.

## SKILLS

**Languages:** Kotlin, Typescript, Python, Scala (Typelevel), Swift, & Haskell.

**Cloud:** Object storage, Postgres, MongoDB, Redis, instances, & message queues.

**Tools:** Docker, Terraform, Gradle, & Make.
